SUMMARY

AI/ML engineer in training with hands-on experience building LLM-powered applications, RAG pipelines, and agentic systems. Dual-degree student (IIT Madras Data Science + ITER CSE) combining mathematical foundations with practical deployment skills. Seeking to apply LLM and agentic AI expertise in research-oriented environments.

EDUCATION

Siksha 'O' Anusandhan University (ITER)

Expected Apr 2027

B.Tech in Computer Science & Engineering — Currently 6th Semester, Bhubaneswar

Indian Institute of Technology, Madras

Expected 2027

BS in Data Science & Applications (Online) — Diploma Level

Relevant Coursework: Data Structures & Algorithms, Machine Learning Foundations, Statistical Inference, Linear Algebra, Probability, Systems Programming

TECHNICAL SKILLS

AI / LLM: OpenAI API, HuggingFace Transformers, LangChain, RAG, Prompt Engineering, Ollama, Agentic Systems

ML & Math: PyTorch, Scikit-learn, Supervised/Unsupervised Learning, Linear Algebra, Probability & Statistics

Programming: Python, Java, Kotlin, JavaScript, C

Web & Backend: Flask, SQLAlchemy, SQLite, REST APIs

Mobile: Android (Jetpack Compose, Room DB, Material 3)

Tools: Git, GitHub, WSL2 Linux, Notion, Obsidian

PROJECTS

Agentic AI System *Anant Chakra: Agentic Council*

Apr 2026

- Designed a multi-agent pipeline with tool integration and autonomous task decomposition using LangChain-style orchestration.
- Optimized inter-agent communication to minimize redundant LLM calls and improve task-completion reliability.

Placement Portal — Full-Stack Web Application

Mar 2026

- Built and deployed a Flask web application for placement workflows; designed database schema and authentication flow using SQLAlchemy and SQLite.
- Structured the project to follow standard backend conventions, making routing, models, and templates easy to extend.

TDS Data Analyst Agent

Sep 2025

- Engineered a Python web service that accepts natural-language questions, analyzes attached files or web data, and returns answers.
- Integrated LLM tool-use patterns so the agent can decide between multiple data sources per query.

TDS Virtual TA — LLM Teaching Assistant

Jun 2025

- Built a GPT-powered teaching assistant for the IIT Madras Tools in Data Science course, automating grading logic and explaining statistical concepts.
- Implemented Retrieval-Augmented Generation (RAG) to ground responses in course material, significantly reducing hallucinations.

ProductiVize — AI-Powered Productivity Tracker

Sep 2025

- Android app (Jetpack Compose, Room DB, Material 3) converting hourly self-ratings into visual achievement metrics with AI-based inference.

WORKSHOPS & EVENTS

- Cybersecurity Workshop, IIT Bombay — Nov 2025
- Mood Indigo, IIT Bombay — Dec 2025
- SOA E-Summit 2024 — Apr 2024
