SUMMARY

Pre-final year CSE student (IIT Madras Data Science + ITER) building LLM-powered applications, RAG pipelines, and multi-agent AI systems. Comfortable across the Python data stack — from ingestion and analysis to model deployment. Seeking applied research or engineering roles in AI / data science.

EDUCATION

Siksha 'O' Anusandhan University (ITER), Bhubaneswar

2023 – Expected 2027

B.Tech, Computer Science & Engineering — Pre-Final Year

Indian Institute of Technology, Madras

2023 – Expected 2027

BS, Data Science & Applications — Diploma Level

Coursework: Data Structures & Algorithms, Machine Learning, Statistical Inference, Probability, Systems Programming

INTERSHIPS

Celebal Technologies — Data Science Intern · Microsoft Gold Partner

Jun – Jul 2026 (Incoming)

- Joining as Data Science Intern; focus on data pipelines, ML modelling, and analytics use cases.

Cisco × AICTE Virtual Internship — AI Track

Jun – Jul 2026 (Incoming)

- Structured AI curriculum via Cisco NetAcad with capstone project, industry session, and Cisco-endorsed certificate.

TECHNICAL SKILLS

ML & Data: PyTorch, Scikit-learn, Pandas, NumPy, Supervised/Unsupervised Learning, Statistical Inference, Linear Algebra

AI / LLM: OpenAI API, HuggingFace Transformers, LangChain, RAG, Prompt Engineering, Ollama, Agentic Systems

Programming: Python, Java, JavaScript, C, C++

Web & Backend: Flask, SQLAlchemy, SQLite, REST APIs

Mobile: Android — Jetpack Compose, Room DB, Material 3 (basic)

Tools: Git, GitHub, WSL2 Linux, Notion

PROJECTS

Anant Chakra: Agentic Council — Multi-Agent AI System

Apr 2026

- LangChain-orchestrated multi-agent pipeline with tool integration and autonomous task decomposition; optimised inter-agent communication to cut redundant LLM calls.

Placement Portal — Full-Stack Web Application

Mar – Apr 2026

- Flask web app for placement workflows; designed SQLAlchemy schema, session-based authentication, and MVC architecture for clean separation of concerns.

TDS Data Analyst Agent

Aug – Sep 2025

- Python service accepting natural-language queries; uses LLM tool-use patterns to route across structured files and web data, returning structured answers.

TDS Virtual TA — LLM Teaching Assistant

Jun – Aug 2025

- GPT-powered TA for IIT Madras TDS course; RAG-grounded responses over course material with automated grading logic and on-demand statistical concept explanation.

ProductiVize — AI-Powered Productivity Tracker

Oct 2025

- Android app converting hourly self-ratings into visual productivity metrics via on-device AI inference.

ACHIEVEMENTS & EVENTS

MetaCode, IIT Kharagpur (Apr 2026) · Cybersecurity Workshop, IIT Bombay (Nov 2025) · E-Summit, SOA University (Apr 2024)
