SUMMARY

Pre-final year CSE student (SOA University) pursuing a concurrent BS in Data Science from IIT Madras — building LLM-powered applications, RAG pipelines, and multi-agent AI systems. Comfortable across the Python data stack, from ingestion and analysis to model deployment. Seeking applied research or engineering roles in AI/ML and data science.

EDUCATION

Siksha 'O' Anusandhan University (ITER), Bhubaneswar 2023 – Expected 2027

B.Tech, Computer Science & Engineering — Pre-Final Year

Indian Institute of Technology, Madras 2023 – Expected 2027

BS, Data Science & Applications — Diploma Level

Coursework: Data Structures & Algorithms, Machine Learning, Statistical Inference, Probability, Systems Programming

INTERNSHIP

Celebal Technologies — Data Science Intern · Microsoft Gold Partner Jun – Jul 2026

- Completed an 8-week applied ML/DL/GenAI curriculum (Python, scikit-learn, TensorFlow/Keras) — from-scratch notebooks weekly spanning classical ML, deep learning, and generative AI.
- Built a leakage-free time-series forecasting pipeline (R^2 0.99) and a full RAG QA pipeline (FAISS + sentence-transformers + flan-t5-base, 7/7 eval accuracy).

TECHNICAL SKILLS

ML & Data: PyTorch, TensorFlow/Keras, Scikit-learn, Pandas, NumPy, Supervised/Unsupervised Learning, Statistical Inference, Linear Algebra

AI / LLM: OpenAI API, HuggingFace Transformers, LangChain, RAG (FAISS, sentence-transformers), Prompt Engineering, Ollama, Agentic Systems

Programming: Python, Java, JavaScript, C, C++

Web & Backend: FastAPI, Flask, SQLAlchemy, SQLite, REST APIs, JWT Auth

Tools: Git, GitHub, WSL2 Linux, Notion

PROJECTS

AI Academic Project Mentor — Multi-Agent Academic Advising Platform Jul – Aug 2026

- Co-built (2-person team) a 9-agent Gemini-powered platform turning a student's idea into a full blueprint (feasibility, scope, tech, timeline, risk) with grounded-chat mentoring and progress-driven replanning.
- FastAPI/JWT backend (SQLAlchemy, Postgres-ready) with a faculty health-status dashboard; covered by 25+ automated tests.

Anant Chakra: Agentic Council — Multi-Agent AI System Apr 2026

- LangChain-orchestrated multi-agent pipeline with tool integration and autonomous task decomposition; optimised inter-agent communication to cut redundant LLM calls.

TDS Data Analyst Agent Aug – Sep 2025

- Python service accepting natural-language queries; uses LLM tool-use patterns to route across structured files and web data, returning structured answers.

TDS Virtual TA — LLM Teaching Assistant Jun – Aug 2025

- GPT-powered TA for IIT Madras TDS course; RAG-grounded responses over course material with automated grading logic and on-demand statistical concept explanation.

ACHIEVEMENTS & EVENTS

MetaCode, IIT Kharagpur (Apr 2026) · E-Summit, SOA University (Apr 2024)
